1. General Overview

This strategy has been prepared in accordance with the Statutory Guidance on Local Government Investments 3rd Edition hereafter known as ‘the Guidance’, which has been issued under section 15(1)(a) of the Local Government Act 2003. Under that section of the act local authorities are required to “have regard” to “such guidance as the Secretary of State may issue”.

The Guidance, which is applicable to all local authorities in England, states:

> This guidance applies to parish councils…...providing their total investments exceeds, or are expected to exceed, £100,000 at any time during the financial year. Where a parish council….expects its total investments to be between £10,000 and £100,000, it is encouraged to adopt the principles in this guidance.

2. Capital Expenditure and Financing

Capital expenditure underpins the Authority’s treasury management and investment strategy.

Decisions made to approve capital expenditure will have major consequences for the Council’s investment capacity and implications for future financial sustainability. Capital expenditure, capital financing and treasury management activity contributes to the Council’s provision of services.

Capital expenditure is where the Authority spends money on assets, such as property or vehicles, that will be used for more than one year. In local government this includes spending on assets owned by other bodies, and loans and grants to other bodies enabling them to buy assets. The Authority has some limited discretion on what counts as capital expenditure, for example assets costing below £10,000 are not capitalised and are charged to revenue in year.

In 2023/24, the Authority is planning capital expenditure of £697,750 as summarised below:

Table 1: Estimates of Capital Expenditure in £

	2021/22 actual	**2022/23 forecast**	**2023/24 budget**	**2024/25 budget**	**2025/26 budget**
Capital Receipts	242,502	136,260	325,750	190,000	265,445
Earmarked Reserves	79,530	58,190	335,000	1,035,000	449,555
Community Infrastructure Levy		76,000	37,000	0	0
Grants/Contributions	50,000	26,375	0	0	0
General Fund	0	33,750	0	0	0
TOTAL	**372,032**	**330,575**	**697,750**	**1,225,000**	**715,000**

All capital expenditure in the medium term is expected to be financed from the Authority’s own resources.

3. Treasury Management and Investment Strategy 2023/24

An Authority may invest its money for three broad purposes:

- because it has surplus cash as a result of its day-to-day activities, for example when income is received in advance of expenditure (known as ***treasury management investments***),
- to support local public services by lending to or buying shares in other organisations (***service investments***), and
- to earn investment income (known as ***commercial investments*** where this is the main purpose).

Investments made by local authorities can be classified into one of two main categories:

- Investments held for treasury management purposes; and
- Other, non-treasury, investments.

As such it has been deemed appropriate to separate this strategy into two sections; the treasury management strategy recommended by CIPFA and the non-treasury investment strategy required by the Department for Levelling Up, Housing and Communities (DLUHC) formerly MHCLG.

a) Treasury Management Investments

Treasury management is the management of the Authority's cash flows, borrowing and investments, and the associated risks. The Authority typically receives its income in cash (e.g. from taxes and services) before it pays for its expenditure in cash (e.g. through payroll and invoices). It also holds reserves for future expenditure. These activities, plus the timing of borrowing decisions, lead to a cash surplus which is invested in accordance with guidance from the Chartered Institute of Public Finance and Accountancy.

The Authority has invested substantial sums of money and is therefore exposed to financial risks including the loss of invested funds and the revenue effect of changing interest rates. The successful identification, monitoring and control of financial risk are therefore central to the Authority's prudent financial management. The contribution that these investments make to the objectives of the Authority is to support effective treasury management activities.

Treasury risk management at the Authority is conducted with due regard to the Chartered Institute of Public Finance and Accountancy's *Guidance for Smaller Public Organisations on the Application of the CIPFA Code of Practice for Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes 2017 Edition* (the CIPFA Code) which requires the Authority to approve a treasury management strategy before the start of each financial year. This report fulfils the Authority's obligation to have regard to the CIPFA Code and any other appropriate guidance.

In accordance with DLUHC Guidance, the Authority will be asked to approve a revised Treasury Management Strategy Statement should the assumptions on which this report is based change significantly. Such circumstances would include, for example, a large, unexpected change in interest rates, or in the Authority's capital programme or in the level of its investment balance.

i) External Context

Economic background: The ongoing impact on the UK from the war in Ukraine, together with higher inflation, higher interest rates, uncertain government policy, and a deteriorating economic outlook, will be major influences on the Authority's treasury management strategy for 2023/24.

The Bank of England (BoE) increased Bank Rate by 0.75% to 3.0% in November 2022, the largest single rate hike since 1989 and the eighth successive rise since December 2021. The decision was voted for by a 7-2 majority of the Monetary Policy Committee (MPC), with one of the two dissenters voting for a 0.50% rise and the other for just a 0.25% rise.

The November quarterly Monetary Policy Report (MPR) forecast a prolonged but shallow recession in the UK with CPI inflation remaining elevated at over 10% in the near-term. While the projected peak of inflation is lower than in the August report, due in part to the government's support package for household energy costs, inflation is expected to remain higher for longer over the forecast horizon and the economic outlook remains weak, with unemployment projected to start rising.

The UK economy grew by 0.2% between April and June 2022, but the BoE forecasts Gross Domestic Product (GDP) will decline 0.75% in the second half of the calendar year due to the squeeze on household income from higher energy costs and goods prices. Growth is then expected to continue to fall throughout 2023 and the first half of 2024.

CPI inflation is expected to peak at around 11% in the last calendar quarter of 2022 and then fall sharply to 1.4%, below the 2% target, in two years' time and to 0% in three years' time if Bank Rate follows the path implied by financial markets with a peak of 5.25%. However, the BoE has stated it considers this path to be too high, suggesting that the peak in interest rates will be lower, reducing the risk of inflation falling too far below target.

The labour market remains tight for now, with the most recent statistics showing the unemployment rate fell to 3.5%, driven mostly by a shrinking labour force. Earnings were up strongly in nominal terms by 6% for total pay and 5.4% for regular pay but factoring in inflation means real total pay was -2.4% and regular pay -2.9%. Looking forward, the MPR shows the labour market weakening in response to the deteriorating outlook for growth, leading to the unemployment rate rising to around 6.5% in 2025.

Credit outlook: Credit default swap (CDS) prices have followed an upward trend throughout the year, indicating higher credit risk. They have been boosted by the war in Ukraine, increasing economic and political uncertainty and a weaker global and UK outlook, but remain well below the levels seen at the beginning of the Covid-19 pandemic.

CDS price volatility has been higher in 2022 compared to 2021 and this year has seen a divergence in prices between ringfenced (retail) and non-ringfenced (investment) banking entities once again.

The weakening economic picture during 2022 led the credit rating agencies to reflect this in their assessment of the outlook for the UK sovereign as well as several local authorities and financial institutions, revising them from negative to stable.

There are competing tensions in the banking sector which could impact bank balance sheet strength going forward. The weakening economic outlook and likely recessions in many regions increase the possibility of a deterioration in the quality of banks' assets, while higher interest rates provide a boost to net income and profitability.

However, the institutions on our adviser Arlingclose's counterparty list remain well-capitalised and their counterparty advice on both recommended institutions and maximum duration remain under constant review and will continue to reflect economic conditions and the credit outlook.

Interest rate forecast (December 2022): The Authority's treasury management adviser, Arlingclose, forecasts that Bank Rate will continue to rise in 2022 and 2023 as the Bank of England attempts to subdue inflation which is significantly above its 2% target.

While interest rate expectations reduced during October and November 2022, multiple interest rate rises are still expected over the forecast horizon despite looming recession. Arlingclose expects Bank Rate to rise to 4.25% by June 2023 under its central case, with the risks in the near- and medium-term to the upside should inflation not evolve as the Bank forecasts and remains persistently higher.

Yields are expected to remain broadly at current levels over the medium-term, with 5-, 10- and 20-year gilt yields expected to average around 3.5%, 3.5%, and 3.85% respectively over the 3-year period to December 2025. The risks for short, medium and longer-term yields are judged to be broadly balanced over the forecast horizon. As ever, there will undoubtedly be short-term volatility due to economic and political uncertainty and events.

A more detailed economic and interest rate forecast provided by Arlingclose is attached at **Appendix A**.

ii) Local Context

On 31st December 2022, the Authority held investments with a book value of £6.2m (current value of £6.5m). This is set out in further detail at **Appendix B**. Forecast changes in these sums are shown in the balance sheet analysis in Table 2 below.

Table 2: Balance Sheet Summary and Forecast

Gross to Net Borrowing Requirement (Projections)					
	Actual 31-Mar-22 £m	Estimated 31-Mar-23 £m	Estimated 31-Mar-24 £m	Estimated 31-Mar-25 £m	Estimated 31-Mar-26 £m
External Borrowing & Other Long Term Liabilities (at Nominal Value)	0	0	0	0	0
Balances & Reserves (Book value)	5.73	5.44	4.61	3.21	2.54
(Net Borrowing Requirement)/ Investment Capacity	5.73	5.44	4.61	**3.21**	2.54

Usable reserves and working capital are the underlying resources available for investment. Investment capacity is set to fall to £2.54m (book value) as capital receipts and earmarked reserves are used to finance capital expenditure (see Table 1).

iii) Borrowing Strategy

Local Council borrowing is governed by Schedule 1 to the Local Government Act 2003. Parish & town councils in England have to apply and receive approval from the Secretary of State before taking up any borrowing. Certain temporary borrowings do not require borrowing approval. The amount that an individual town council will be authorised to borrow will normally be limited to a maximum of

£500,000 in any single financial year. Borrowing may only be entered into for a purpose that would be capital expenditure as defined in section 16 of the Local Government Act 2003 and the decision to borrow must be made by full council.

As indicated in Table 2, the Authority is currently debt free and its capital expenditure plans do not imply any external borrowing requirement over the forecast period. However, external borrowing may be considered where it has been identified that the cost of the loan will have a nil effect on the precept requirement i.e the annual revenue cost of a loan repayment can be met from additional income generated by the asset financed by the loan. The Council's requirement to borrow will be reviewed annually as part of the Council's TMS and assessed in conjunction with the Council's capital programme.

Consideration may also be given to other sources of debt finance, which although they are not classed as borrowing, but may be classed as other debt liabilities. These are:

- leasing
- hire purchase

Any potential future capital financing options will be assessed so as to minimise the costs to revenue.

The Responsible Financial Officer may from time to time authorise the use of a temporary bank overdraft facility to facilitate cash flow throughout the financial year.

iv) Investment Strategy

The Authority holds significant invested funds, representing income received in advance of expenditure plus balances and reserves held. In the past 12 months, the Authority's investment balance has ranged between £5.7m and £6.5m (book value) and £6.5m and £7.3m (current value). The funds that the Council holds for investment purposes are expected to decrease in the forthcoming year due to the financing of the Council's capital programme.

Objectives & Risk Management: The CIPFA Code requires the Authority to invest its funds prudently, and to have regard to the security and liquidity of its investments before seeking the highest rate of return, or yield. The Authority's objective when investing money is to strike an appropriate balance between risk and return, minimising the risk of incurring losses from defaults and the risk of receiving unsuitably low investment income. Where balances are expected to be invested for more than one year, the Authority will aim to achieve a total return that is equal or higher than the prevailing rate of inflation, in order to maintain the spending power of the sum invested. The Authority aims to be a responsible investor and will consider environmental, social and governance (ESG) issues when investing.

Strategy: The Authority expects to be a long-term investor and treasury investments will therefore include both short-term low risk instruments to manage day-to-day cash flows and longer-term instruments where limited additional risk is accepted in return for higher investment income to support local public services.

ESG policy: Environmental, social and governance (ESG) considerations are increasingly a factor in global investors' decision making, but the framework for evaluating investment opportunities is still developing and therefore the Authority's investment strategy does not yet include an agreed ESG policy. When investing in banks and funds, the Authority will aim to prioritise banks that are signatories to the UN Principles for Responsible Banking and funds operated by managers that are signatories to the UN Principles for Responsible Investment, the Net Zero Asset Managers Alliance and/or the UK Stewardship Code

Approved Counterparties: The Authority may invest its surplus funds with any of the counterparty types in Table 3 below, subject to the cash limits (per counterparty) and the time limits shown.

Table 3: Treasury investment counterparties and limits

Sector	Time limit	Counterparty limit	Sector limit
The UK Government	50 years	Unlimited	n/a
Local authorities & other government entities	25 years	£1m	Unlimited
Secured investments *	25 years	£1m	Unlimited
Banks (unsecured) *	13 months	£1m	£2m
Building societies (unsecured) *	13 months	£0.5m	£1m
Registered providers (unsecured) *	5 years	£0.5m	£1m
Money market funds *	n/a	£0.5m	£1m
Strategic pooled funds	n/a	£4m	£6m
Real estate investment trusts	n/a	£1m	£1m

Minimum Credit Rating: Treasury investments in the sectors marked with an asterisk will only be made with entities whose lowest published long-term credit rating is no lower than [A-]. Where available, the credit rating relevant to the specific investment or class of investment is used, otherwise the counterparty credit rating is used. However, investment decisions are never made solely based on credit ratings, and all other relevant factors including external advice will be taken into account.

Government: Loans to, and bonds and bills issued or guaranteed by, national governments, regional and local authorities and multilateral development banks. These investments are not subject to bail-in, and there is generally a lower risk of insolvency, although they are not zero risk. Investments with the UK Government are deemed to be zero credit risk due to its ability to create additional currency and therefore may be made in unlimited amounts for up to 50 years.

Secured investments: Investments secured on the borrower's assets, which limits the potential losses in the event of insolvency. The amount and quality of the security will be a key factor in the investment decision. Covered bonds and reverse repurchase agreements with banks and building societies are exempt from bail-in. Where there is no investment specific credit rating, but the collateral upon which the investment is secured has a credit rating, the higher of the collateral credit rating and the counterparty credit rating will be used. The combined secured and unsecured investments with any one counterparty will not exceed the cash limit for secured investments.

Banks and building societies (unsecured): Accounts, deposits, certificates of deposit and senior unsecured bonds with banks and building societies, other than multilateral development banks. These investments are subject to the risk of credit loss via a bail-in should the regulator determine that the bank is failing or likely to fail. See below for arrangements relating to operational bank accounts.

Registered providers (unsecured): Loans to, and bonds issued or guaranteed by, registered providers of social housing or registered social landlords, formerly known as housing associations. These bodies are regulated by the Regulator of Social Housing (in England), the Scottish Housing Regulator, the Welsh Government and the Department for Communities (in Northern Ireland). As providers of public services, they retain the likelihood of receiving government support if needed.

Money market funds: Pooled funds that offer same-day or short notice liquidity and very low or no price volatility by investing in short-term money markets. They have the advantage over bank accounts of providing wide diversification of investment risks, coupled with the services of a professional fund manager in return for a small fee. The Authority will take care to diversify its liquid investments over a variety of providers to ensure access to cash at all times.

Strategic pooled funds: Bond, equity and property funds that offer enhanced returns over the longer term but are more volatile in the short term. These allow the Authority to diversify into asset classes other than cash without the need to own and manage the underlying investments. Because these funds have no defined maturity date, but are available for withdrawal after a notice period, their performance and continued suitability in meeting the Authority's investment objectives will be monitored regularly.

Real estate investment trusts: Shares in companies that invest mainly in real estate and pay the majority of their rental income to investors in a similar manner to pooled property funds. As with property funds, REITs offer enhanced returns over the longer term, but are more volatile especially as the share price reflects changing demand for the shares as well as changes in the value of the underlying properties.

Operational bank accounts: The Authority may incur operational exposures, for example through current accounts, collection accounts and merchant acquiring services, to any UK bank with credit ratings no lower than BBB- and with assets greater than £25 billion. These are not classed as investments, but are still subject to the risk of a bank bail-in, and balances will therefore be kept below £2m per bank. The Bank of England has stated that in the event of failure, banks with assets greater than £25 billion are more likely to be bailed-in than made insolvent, increasing the chance of the Authority maintaining operational continuity.

Risk Assessment and Credit Ratings: Credit ratings are obtained and monitored by the Authority's treasury advisers, who will notify changes in ratings as they occur. Where an entity has its credit rating downgraded so that it fails to meet the approved investment criteria then:

- no new investments will be made,
- any existing investments that can be recalled or sold at no cost will be, and
- full consideration will be given to the recall or sale of all other existing investments with the affected counterparty.

Where a credit rating agency announces that a credit rating is on review for possible downgrade (also known as “rating watch negative” or “credit watch negative”) so that it may fall below the approved rating criteria, then only investments that can be withdrawn on the next working day will be made with that organisation until the outcome of the review is announced. This policy will not apply to negative outlooks, which indicate a long-term direction of travel rather than an imminent change of rating.

Other Information on the Security of Investments: The Authority understands that credit ratings are good, but not perfect, predictors of investment default. Full regard will therefore be given to other available information on the credit quality of the organisations in which it invests, including credit default swap prices, financial statements, information on potential government support, reports in the quality financial press and analysis and advice from the Authority’s treasury management adviser. No investments will be made with an organisation if there are substantive doubts about its credit quality, even though it may otherwise meet the above criteria.

When deteriorating financial market conditions affect the creditworthiness of all organisations, as happened in 2008 and 2020, this is not generally reflected in credit ratings, but can be seen in other market measures. In these circumstances, the Authority will restrict its investments to those organisations of higher credit quality and reduce the maximum duration of its investments to maintain the required level of security. The extent of these restrictions will be in line with prevailing financial market conditions. If these restrictions mean that insufficient commercial organisations of high credit quality are available to invest the Authority’s cash balances, then the surplus will be deposited with the UK Government, via the Debt Management Office or invested in government treasury bills for example, or with other local authorities. This will cause investment returns to fall but will protect the principal sum invested.

Investment Limits: In order to minimise the amount of reserves that would be put at risk in the case of a single default, the maximum that will be lent to any one organisation (other than the UK Government) will be £4million. A group of entities under the same ownership will be treated as a single organisation for limit purposes. Limits are also placed on fund managers and foreign countries. Investments in pooled funds and multilateral development banks do not count against the limit for any single foreign country, since the risk is diversified over many countries.

Table 4: Investment Limits

	Cash limit
Any group of organisations under the same ownership	£4m per group
Any group of pooled funds under the same management	£4m per manager
Foreign Countries	£1m per country

Liquidity management: The Authority will invest prudently in the short term to ensure the liquidity of funds, to minimise the risk of the Authority not being able to meet its financial commitments.

The Authority will spread its liquid cash over at least three providers (e.g. bank accounts and money market funds) to ensure that access to cash is maintained in the event of operational difficulties at any one provider.

v) Treasury Management Prudential Indicators

The Authority will measure and manage its exposures to treasury management risks using the following indicators.

Security: The Authority has adopted a voluntary measure of its exposure to credit risk by monitoring the value-weighted average credit rating of its investment portfolio. This is calculated by applying a score to each investment (AAA=1, AA+=2, etc.) and taking the arithmetic average, weighted by the size of each investment. Unrated investments are assigned a score based on their perceived risk.

Credit risk indicator	Target
Portfolio average credit rating	A

Liquidity: The Authority has adopted a voluntary measure of its exposure to liquidity risk by monitoring the amount of cash available to meet unexpected payments within a rolling three-month period, without additional borrowing.

Liquidity risk indicator	Target
Total cash available within 3 months	£0.75m

vi) Financial Implications

The budget for investment income in 2023/24 is £185,000, based on an average investment portfolio of £5.4million at an interest rate of 3.4%. If actual levels of investments, or actual interest rates differ from those forecast, performance against budget will be correspondingly different.

b) Non-treasury Investments

The Guidance focuses on non-treasury investments including:

- loans made for service purposes
- shares in companies bought for service purposes
- loans to and shares in subsidiaries, irrespective of the purpose of the company
- non-financial assets (e.g. property) held primarily or partially to generate a profit

i) Service Investments: Loans

Contribution: Supplemental to Section 12 of the Local Government Act 2003 or Section 24 of the Local Government Act 1988, under the General Power of Competence, Section 1 of the Localism Act 2011, the authority may choose to make loans to local enterprises, local charities or community organisations, wholly owned companies and joint ventures as part of a wider strategy for local economic growth even though these loans may not all be seen as prudent if adopting a narrow definition of prioritising security and liquidity.

The Council does not currently lend money directly to any local businesses, local charities or community organisations, or housing associations. However, this has not been precluded from any potential future transactions.

Security: The main risk when making service loans is that the borrower will be unable to repay the principal lent and/or the interest due.

Risk assessment: Should the Council be approached to make a loan to support local public services and as part of a wider strategy to stimulate local economic growth it may consider applications. The Authority will assess the risk of loss before entering into any service loan, while having regard to the Guidance and must be able to demonstrate that:

- Total financial exposure to these type of loans are proportionate;
- They must use an allowed "expected credit loss" model for loans as set out in the "International Financial Reporting Standard (IFRS) 9 Financial Instruments" as adopted by proper practices to measure the credit risk of the loan portfolio;
- There are appropriate credit control arrangements to recover overdue repayments in place and;
- The Authority must formally agree the total level of loans by type that it is willing to make and that the total loan book is within self-assessed limits.

ii) <u>Service Investments: Shares</u>
Contribution: The Council does not currently invest in the shares of any local businesses.

Security: One of the risks of investing in shares is that they fall in value meaning that the initial outlay may not be recovered.

Risk assessment: Any application received to invest in shares from another party will be assessed on its own merits and must be able to demonstrate a benefit to local public services and stimulate local economic growth. Although the investment in shares has not been precluded, it is unlikely that the Council would approve this type of investment due to the high level of risk that this category of investment carries.

Non-specified Investments: Shares are the only investment type that the Authority has identified that meets the definition of a non-specified investment in the government guidance. The Authority has not adopted any procedures for determining further categories of non-specified investment since none are likely to meet the definition.

iii) <u>Commercial Investments: Property</u>
Contribution: The Council does not currently invest directly in commercial property with the intention of making a profit that will be spent on local public services.

Security: In accordance with government guidance, the Authority considers a property investment to be secure if its accounting valuation is at or higher than its purchase cost including taxes and transaction costs.

Risk assessment: The Authority will assess the risk of loss before entering into and whilst holding property investments, should this type of investment be considered at a future date.

Liquidity: Compared with other investment types, property is relatively difficult to sell and convert to cash at short notice, and can take a considerable period to sell in certain market conditions. As such the Council will only enter into the purchase of property through pooled funds, a treasury management investment, unless the Council is able to demonstrate that the purchase of commercial property would be a benefit to local public services and/or stimulate local economic growth.

4. Related Matters

Policy on Use of Financial Derivatives: In the absence of any explicit legal power to do so, the Authority will not use standalone financial derivatives (such as swaps, forwards, futures and options). Derivatives embedded into loans and investments, including pooled funds and forward starting transactions, may be used, and the risks that they present will be managed in line with the overall treasury risk management strategy.

Borrowing in Advance of Need: The Council recognises that the borrowing of money purely to invest is ultra vires and the Council will not engage in this activity.

Markets in Financial Instruments Directive: The Authority has retained retail client status with its providers of financial services, including advisers, banks, brokers and fund managers, allowing it access to a smaller range of services but with the greater regulatory protections afforded to individuals and small companies. Presently, given the size and range of the Authority's treasury management activities, this is the only status that the Authority can adopt.

Retail Client Suitability Report: As a retail client, the council is obliged by its treasury advisors, Arlingclose, to complete a Retail Client Suitability Report, which will be reviewed at least annually to ensure it is still fit for purpose. The report summarises the Council's financial position, its investment objectives and constraints, acknowledges risk and gives a recommendation as to the suitability of the Council's investment portfolio in achieving its objective.

5. Capacity, Skills and Culture

Elected members and statutory officers: The needs of the Authority's treasury management staff for training in investment management are assessed as part of the staff appraisal process, and additionally when the responsibilities of individual members of staff change. Where Council staff do not have the knowledge and skills required, use is made of external advisers and consultants that are specialists in their field. The Council currently employs Arlingclose Limited as treasury management advisers.

Staff attend training courses, seminars and conferences provided by Arlingclose. Elected members are also encouraged to engage in investment decisions and are invited to attend strategy meetings held with Arlingclose.

Corporate governance: The Council delegates responsibility for the implementation and monitoring of its treasury management policies and practices to the Finance & Governance Committee and for the execution and administration of treasury management decisions to the Responsible Finance Officer who acts in accordance with the organisation's policy statement and TMPs.

The Finance & Governance Committee is responsible for ensuring effective scrutiny of the treasury management strategy, policies and investment decisions.

Appendix A – Arlingclose Economic & Interest Rate Forecast – December 2022

Underlying assumptions:

- The influence of the mini-budget on rates and yields continues to wane following the more responsible approach shown by the new incumbents of Downing Street.
- Volatility in global markets continues, however, as investors seek the extent to which central banks are willing to tighten policy, as evidence of recessionary conditions builds. Investors have been more willing to price in the downturn in growth, easing financial conditions, to the displeasure of policymakers. This raises the risk that central banks will incur a policy error by tightening too much.
- The UK economy is already experiencing recessionary conditions and recent GDP and PMI data suggests the economy entered a technical recession in Q3 2022. The resilience shown by the economy has been surprising, despite the downturn in business activity and household spending. Lower demand should bear down on business pricing power – recent data suggests the UK has passed peak inflation.
- The lagged effect of the sharp tightening of monetary policy, and the lingering effects of the mini-budget on the housing market, widespread strike action, alongside high inflation, will continue to put pressure on household disposable income and wealth. The short- to medium-term outlook for the UK economy remains bleak.
- Demand for labour appears to be ebbing, but not quickly enough in the official data for most MPC policymakers. The labour market remains the bright spot in the economy and persisting employment strength may support activity, although there is a feeling of borrowed time. The MPC focus is on nominal wage growth, despite the huge real term pay cuts being experienced by the vast majority. Bank Rate will remain relatively high(er) until both inflation and wage growth declines.
- Global bond yields remain volatile as investors price in recessions even as central bankers push back on expectations for rate cuts in 2023. The US labour market remains tight and the Fed wants to see persistently higher policy rates, but the lagged effects of past hikes will depress activity more significantly to test the Fed's resolve.
- While the BoE appears to be somewhat more dovish given the weak outlook for the UK economy, the ECB seems to harbour (worryingly) few doubts about the short term direction of policy. Gilt yields will be broadly supported by both significant new bond supply and global rates expectations due to hawkish central bankers, offsetting the effects of declining inflation and growth.

Forecast:

- The MPC raised Bank Rate by 50bps to 3.5% in December as expected, with signs that some members believe that 3% is restrictive enough. However, a majority of members think further increases in Bank Rate might be required. Arlingclose continues to expect Bank Rate to peak at 4.25%, with further 25bps rises February, March and May 2023.
- The MPC will cut rates in the medium term to stimulate a stuttering UK economy, but will be reluctant to do so until wage growth eases. We see rate cuts in the first half of 2024.
- Arlingclose expects gilt yields to remain broadly steady over the medium term, although with continued volatility across shorter time periods.

- Gilt yields face pressures to both sides from hawkish US/EZ central bank policy on one hand to the weak global economic outlook on the other. BoE bond sales and high government borrowing will provide further underlying support for yields.

	Current	Mar-23	Jun-23	Sep-23	Dec-23	Mar-24	Jun-24	Sep-24	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25
