Dear Niki

As discussed, please find photos attached from the residents of Sunridge Close in support of our request for:-

- Double yellow lines to be painted on the corner as vehicles exit the Close onto Cluny Crescent going left/downhill and the white line which indicates entry to the driveway of 16 Cluny Crescent.
- Existing double yellow lines to be refreshed on the opposite corner going uphill.

Cars regularly park on both these corners, making it impossible for cars exiting the close to see if traffic is going both up and down Cluny Crescent. Given the speed cars can reach either going downhill or having "gunned" the engine to go uphill, it is often extremely dangerous to exit.

1. IMG 0001 is taken from inside a car trying to exit the close. I have taken the photo when a relatively small vehicle is parking on the downhill corner, The lack of visibility becomes progressively worse with larger vehicles
2. IMG 0010 shows the the same vehicle parked in the area in question and the white line in front of the Cluny Crescent driveway.
3. IMG 0002 shows the very poor state of the double yellow lines on the opposite corner. Cars routinely park on these right up to the corner in the evening and during the season causing a similar lack of visibility.

I trust this is enough Niki, but of course let me know if you need anything else.

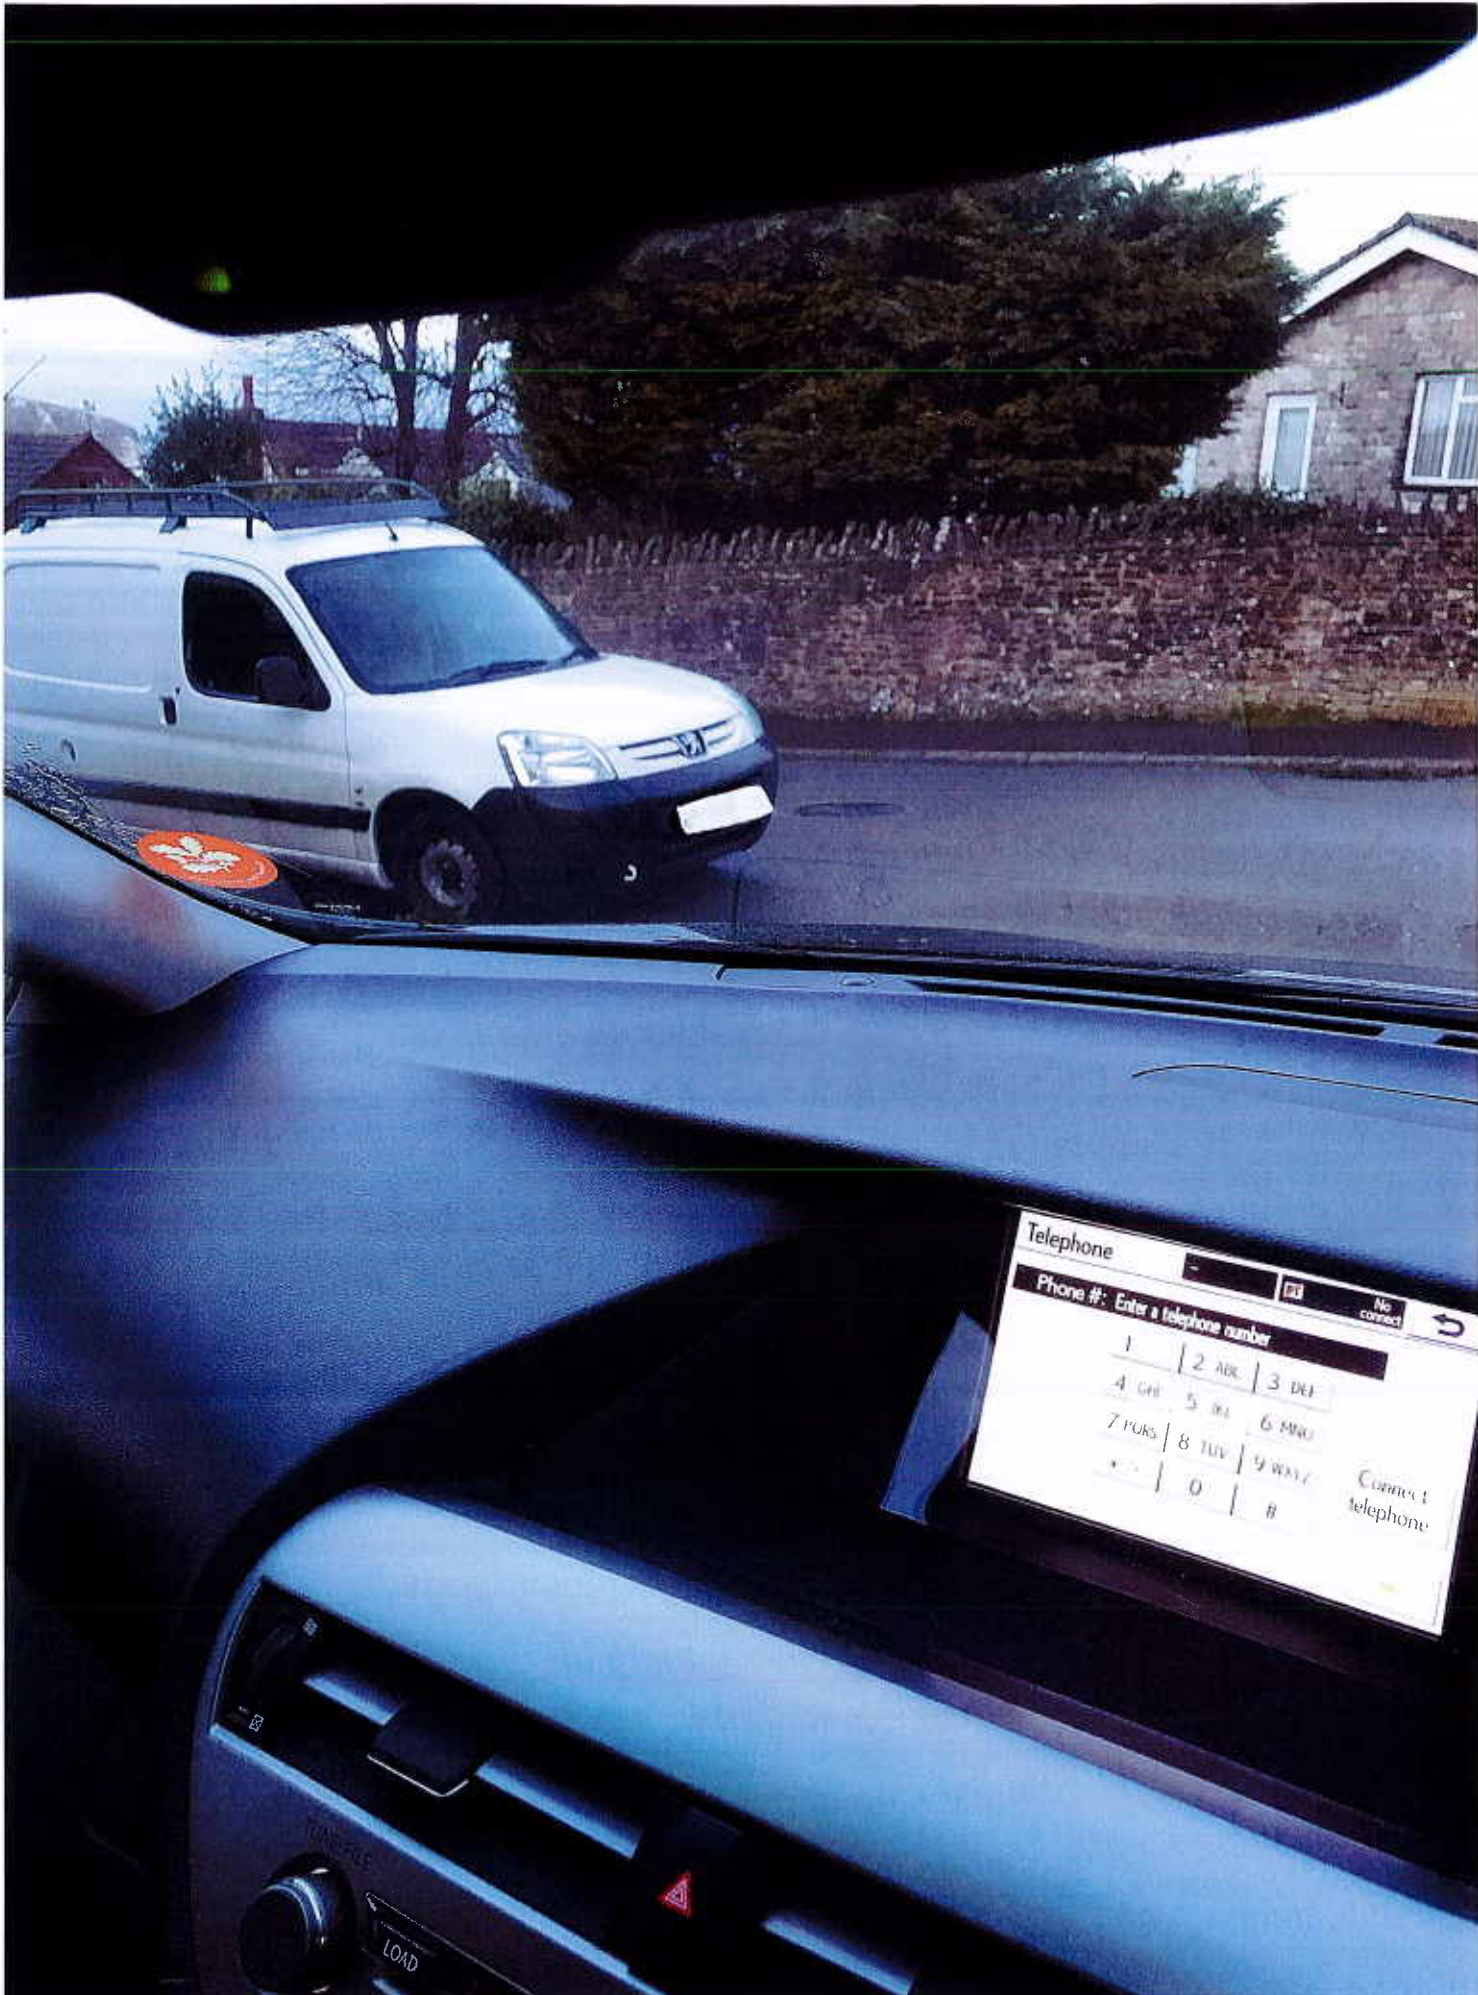

I look forward to the meeting.

Thank-you and Regards

Nicola
